1.	line to Brest between 10 and 18 August, the rate had risen to approximately 12 trains per day as of 11 September. These trains carry normal loads of machine parts, uranium, tank cars, etc. No military traffic was observed. The two leave trains and the Blue Express are travelling their normal schedul. There has been no evidence of partisan activity or any other form of resistance to the government within Poland during the past month.  There have been no changes in the operations or the organization of the railway brigades during the past month. Towever, all trains from Frankfurt	.es.
1.	line to Brest between 10 and 18 August, the rate had risen to approximately 12 trains per day as of 11 September. These trains carry normal loads of machine parts, uranium, tank cars, etc. No military traffic was observed. The two leave trains and the Blue Express are travelling their normal schedul. There has been no evidence of partisan activity or any other form of resistance to the government within Poland during the past month.  There have been no changes in the operations or the organization of the railway brigades during the past month. Nowever, all trains from Frankfurt to Brest will be routed around Carsaw in October or November 1953. This will be difficult to carry out, as the line around Carsaw is not capable of handling normal brigade traffic.  The reason given for the reduction in normal traffic between 10 and 18 august	
2.	line to Brest between 10 and 18 August, the rate had risen to approximately 12 trains per day as of 11 September. These trains carry normal loads of machine parts, uranium, tank cars, etc. No military traffic was observed. The two leave trains and the Blue Express are travelling their normal schedul. There has been no evidence of partisan activity or any other form of resistance to the government within Poland during the past month.  There have been no changes in the operations or the organization of the railway brigades during the past month. However, all trains from Frankfurt to Brest will be routed around larsaw in October or November 1953. This will be difficult to carry out, as the line around larsaw is not capable of handling normal brigade traffic.	
2. 3.	line to Brest between 10 and 18 August, the rate had risen to approximately 12 trains per day as of 11 September. These trains carry normal loads of machine parts, uranium, tank cars, etc. No military traffic was observed. The two leave trains and the Blue Express are travelling their normal schedul. There has been no evidence of partisan activity or any other form of resistance to the government within Poland during the past month.  There have been no changes in the operations or the organization of the railway brigades during the past month. Nowever, all trains from Frankfurt to Brest will be routed around Carsaw in October or November 1953. This will be difficult to carry out, as the line around Carsaw is not capable of handling normal brigade traffic.  The reason given for the reduction in normal traffic between 10 and 18 acceptance and the industrial quotas for the firms in East Germany were being given their usual periodic review. Until these were completed, no good	
2. 3.	line to Brest between 10 and 18 August, the rate had risen to approximately 12 trains per day as of 11 September. These trains carry normal loads of machine parts, uranium, tank cars, etc. No military traffic was observed. The two leave trains and the Blue Express are travelling their normal schedul. There has been no evidence of partisan activity or any other form of resistance to the government within Poland during the past month.  There have been no changes in the operations or the organization of the railway brigades during the past month. Nowever, all trains from Frankfurt to Brest will be routed around Carsaw in October or November 1953. This will be difficult to carry out, as the line around Carsaw is not capable of handling normal brigade traffic.  The reason given for the reduction in normal traffic between 10 and 18 August mentioned is that the industrial quotas for the firms in Cast Germany were being given their usual periodic review. Until these were completed, no good were shipped.	
2. 3.	line to Brest between 10 and 18 August, the rate had risen to approximately 12 trains per day as of 11 September. These trains carry normal loads of machine parts, uranium, tank cars, etc. No military traffic was observed. The two leave trains and the Blue Express are travelling their normal schedul. There has been no evidence of partisan activity or any other form of resistance to the government within Poland during the past month.  There have been no changes in the operations or the organization of the railway brigades during the past month. Nowever, all trains from Frankfurt to Brest will be routed around Carsaw in October or November 1953. This will be difficult to carry out, as the line around Carsaw is not capable of handling normal brigade traffic.  The reason given for the reduction in normal traffic between 10 and 18 m sust mentioned is that the industrial quotas for the firms in East Germany were being given their usual periodic review. Until these were completed, no good were shipped.  At present the brigades travel three main lines to the USSR	
2. 3.	line to Brest between 10 and 18 August, the rate had risen to approximately 12 trains per day as of 11 September. These trains carry normal loads of machine parts, uranium, tank cars, etc. No military traffic was observed. The two leave trains and the Blue Express are travelling their normal schedul. There has been no evidence of partisan activity or any other form of resistance to the government within Foland during the past month.  There have been no changes in the operations or the organization of the railway brigades during the past month. However, all trains from Frankfurt to Brest will be routed around Larsaw in October or November 1953. This will be difficult to carry out, as the line around larsaw is not capable of handling normal brigade traffic.  The reason given for the reduction in normal traffic between 10 and 18 august mentioned is that the industrial quotas for the firms in last Germany were being given their usual periodic review. Until these were completed, no good were shipped.  At present the brigades travel three main lines to the USSR  (The line to Rava Russkaya has been discontinued):  a. To Brest: Frankfurt/Oder, Swiebodzin, Foznan, Konin, Kutno, Sochaczew, Farsaw, Siedlee. Then on to Brest via Lukow-Terespol or Czeremcha-Tysokoe.	
2. 3.	line to Brest between 10 and 18 August, the rate had risen to approximately 12 trains per day as of 11 September. These trains carry normal loads of machine parts, uranium, tank cars, etc. No military traffic was observed. The two leave trains and the Blue Express are travelling their normal schedul. There has been no evidence of partisan activity or any other form of resistance to the government within Poland during the past month.  There have been no changes in the operations or the organization of the railway brigades during the past month. Towever, all trains from Frankfurt to Brest will be routed around tarsaw in October or November 1953. This will be difficult to carry out, as the line around tarsaw is not capable of handling normal brigade traffic.  The reason given for the reduction in normal traffic between 10 and 18 august mentioned is that the industrial quotas for the firms in East Germany were being given their usual periodic review. Until these were completed, no good were shipped.  At present the brigades travel three main lines to the USSR  (The line to Rava Russkaya has been discontinued):  a. To Brest: Frankfurt/Oder, Swiebodzin, Poznan, Konin, Kutno, Sochaczew, Marsaw, Siedlee. Then on to Brest via Lukow-Ferespol or Czeremcha-Wysokow.  All traffic to Brest uses the above line except those trains exceeding the limits for weight or clearance. These detour from the main line given above	
2. 3.	line to Brest between 10 and 18 August, the rate had risen to approximately 12 trains per day as of 11 September. These trains carry normal loads of machine parts, uranium, tank cars, etc. No military traffic was observed. The two leave trains and thereblue Express are travelling their normal schedul. There has been no evidence of partisan activity or any other form of resistance to the government within Poland during the past month.  There have been no changes in the operations or the organization of the railway brigades during the past month. However, all trains from Frankfurt to Brest will be routed around larsaw in October or November 1953. This will be difficult to carry out, as the line around larsaw is not capable of handling normal brigade traffic.  The reason given for the reduction in normal traffic between 10 and 18 algust mentioned is that the industrial quotas for the firms in Bast Gormany were being given their usual periodic review. Until these were completed, no good were shipped.  At present the brigades travel three main lines to the USSR  (The line to Rava Russkaya has been discontinued):  a. To Brest:  Frankfurt/Oder, Swiebodzin, Poznan, Konin, Kutno, Sochaczew, Marsaw, Siedlee. Then on to Brest via Lukow-Terespol or Czeremcha-Wysokow.  All traffic to Brest uses the above line except those trains exceeding the limits for weight or clearance. These detour from the main line given above around warsaw from Kutno to Plock, Sierpe, Brodnica, Dzialdowo, Nidzica, Wielbark, Grabowo, Ostroleka, Malkinda and then back to Siedlee. This is the	s

-2-

- b. To Gerdauen (Zheleznedorozhny): Kuestrin, Krzyz, Pila, Bydgoszcz, Torun, Jablonowo, Ilawa, Olsztyn, Korsze, Gerdauen.
- c. To Dorohusk:
  Guben, Zagan, Glogow, Leszno, Ostrow Ukp, Lodz, Tomaszow, Radom, Deblin, Lublin, Chelm, Dorohusk.

The routes mentioned in a. above are travelled most frequently, the route: in b. less frequently, and the route in c. only infrequently.

- All lines used by the brigades are double track with the following exceptions, which are single track:
  - a. The line Siedlee-Czeremcha and Czeremcha-Brest. A second track is now under construction between Siedlee and Czeremcha,
  - b. The entire detour around Warsaw described under 5.a. above.
  - c. Terespol-Brest.
  - d. Twenty kilometers .from Dorohusk in the direction of Kowel.
  - e. Twenty-six kilometers south of Gerdauen toward Korsze.
- 7. There has been no new construction other than that mentioned. Construction of railroad lines is carried out by crews using hand tools only.
- 8. The principal bridges in the following locations are in good repair:

Frankfurt/Oder, Poznan, Larsaw, Terespol, Czeremcha, Torun, and the bridge over the Bug south of the junction at Malkinia.
